PROFILE

Mechanical Engineering student at the Federal Institute of Espírito Santo (IFES), with previous experience in administrative activities and current experience in Machine Learning and Artificial Intelligence applied to Engineering. Strong skills in Excel, Python, CAD/CAE tools, data analysis, process automation, organization, analytical thinking, teamwork, and problem solving.

TECHNICAL SKILLS

CAD / CAE / Simulation: Advanced knowledge of SolidWorks, Inventor, and AutoCAD; experience with Ansys (thermal and structural FEA/CFD), Fusion 360, and aerospace software including OpenVSP, XFLR5, and VSPAERO.

Failure Prediction: Python/C++ applied to engineering, data monitoring, and artificial intelligence for industrial failure prediction.

Technology: Python • Artificial Intelligence • Machine Learning • Process Automation • Claude

Excel: VLOOKUP/XLOOKUP • IF • SUMIFS • Filters • Conditional Formatting • Pivot Tables • Charts • Data Organization and Analysis

Professional Skills: Customer Service • Organization • Communication • Problem Solving • Teamwork

EXPERIENCE

Machine Learning & Artificial Intelligence Engineering Intern – FlyRank IA

- Data processing and analysis.
- Application of Artificial Intelligence to Engineering problems.
- Activities related to process automation and optimization.

Administrative Assistant – Havel de Cachoeiro Veículos Ltda.

Apr 2021 – Jan 2022

- Supported administrative and operational routines.
- Organized and archived documents and information.
- Supported the preparation and organization of reports.

EDUCATION

Mechanical Engineering – Federal Institute of Espírito Santo (IFES)

Expected graduation: December 2026

COURSES & CERTIFICATIONS

- Machine Learning and Artificial Intelligence for Engineering
- Intermediate Claude Courses – Anthropic
- Python – Application Development and Automation
- Advanced English – Cambridge
- Industrial Painting

Languages: Portuguese (native) • English (advanced) • Spanish (basic)

Driver's License: Category AB

ACADEMIC PROJECTS

IFES Aerodesign Group (2 years)

- Development of aerospace projects.
- 3D modeling and simulations using OpenVSP and XFLR5.
- Aerodynamic performance and stability studies.
- Teamwork and technical problem solving.

Gas Turbine Project

- Participation in the development of an experimental microturbine.
- Support for technical analyses and project optimization.

Undergraduate Research – OpenVSP and VSPAERO

- Modeling of a trapezoidal aircraft using the Selig1223RTL airfoil.
- Detailed aerodynamic simulations including lift and stability analysis.

Teaching Assistantships

- Teaching Assistant for Mechanical Technical Drawing.
- Teaching Assistant for Basic Programming (C++ and computational logic).
